INDEX TO 1981 ASCE PUBLICATIONS

FOREWORD

The 1981 index, which provides a guide to information published by ASCE during 1981, combines material appearing in the Journals (Proceedings Vol. 107), CIVIL ENGINEERING (Vol. 51), Transactions (Vol. 146), Manuals and Reports, and Special Publications.

The user will find all articles and papers dealing with specific subject areas listed under one or more appropriate headings suggested by the content and application of the paper. The Engineers Joint Council "Thesaurus of Engineering Terms" has been used as the primary source of index terms. The Water Resources Thesaurus of the U.S. Department of the Interior and the Micro-Thesaurus compiled by the Soil Mechanics and Foundations Divisions of ASCE were also used.

The name index contains entries indexed under the names of author, co-authors, discussers, chairmen of committees preparing reports, and deceased members whose memoirs appeared in Transactions.

In the name index, the entry for a Proceedings Paper (under the first name if more than one author) is supplemented by information concerning the discussion, closure and Transactions digest, if applicable. To find what discussion, if any, there has been for a Proceedings Paper located in the subject index, the reader looks under the entry for the first-named author in the name index. When discussion of a paper from a prior year is published, the original entry is repeated. Discussion over a period of time can be traced until the closure to the paper is located.

When a paper appears in Transactions, the complete entry including original paper, discussion, closure, errata (if applicable), and Transactions citation appears in the name index.

Typical abbreviations used herein are:

Dsc for discussion
Clo for closing discussion
Corr for corrections
Err for errata
Chmn for Chairman of a committee submitting a report
TR for Transactions
TN for Technical Note

The original publication can be found from the index entry as follows:

EE1:Feb 81:47:16017
TR:146:287

indicates that the paper was published in the Journal of the Environmental Engineering Division, February 1981, on Page 47, as Proceedings Paper 16017. The notation TR:146:287 indicates that an abstract for the paper appears in *Transactions*, Vol. 146, on page 287.

The entry CE:Sept 81:68 indicates that an article can be found in CIVIL ENGINEERING, September 1981, on page 68.

Entries such as SP:81, 786pp indicate that the work is a special Publication or Manual and Report on Engineering Practice, published in 1981, and is 786 pages.
